STORAGE SOLUTIONS FOR BUILDING PRODUCTS & DIY RETAILERS

Space optimisation | Storage of long & bulky goods | Retail display options

Providing storage solutions for Building Products & DIY retailers

The challenges faced by the Building Products & DIY industry often requires them to store a number of various sized, often heavy products, whilst also displaying them for sale. Maximising space and accessibility are the main challenges.

Some of the key issues that our customers face are:

- ✓ Storing long goods, some up to 3m in length, either vertically or horizontally
- ✓ Bulk storage of sheet materials
- ✓ Dense storage of bagged products on pallets
- ✓ Displaying the items for sale in a storage environment
- ✓ The storage and display of small items in a retail situation

Adjustable storage for Long goods stored vertically

Available in heights of up to 30 meters with varying depths and widths, our P90 racking can perfectly occupy any space. A mixture of loop dividers, pallet storage and shelving can be incorporated for the storage of many various products into a single storage area.

Loop dividers are a useful method of separating and supporting long lengths of wood, plastic pipes, doors or even ladders. Used with Constructor's P90 pallet racking or P90 A-frames they are a robust solution to vertical storage.

Benefits

- ✓ Vertical goods kept separate
- ✓ All goods are supported
- ✓ Variable sizes and colours available
- ✓ Suitable for the storage of wood, plastic, etc
- ✓ Can be combined with other pallet racking accessories

More information see:

High density storage and display of long items stored horizontally

The horizontal storage of longer items in individual locations can create a dense solution, with the added option of placing a mezzanine floor above it for additional storage. Each of the storage locations have rollers along its length, making the insertion or removal of items easy.

Once the goods have been placed into the storage locations the rollers can be locked for safety, allowing individual pieces to be removed one at a time.

XL Byg in Denmark store most of their timber this way and even make use of a special fork lift truck jigger for the loading and unloading of the racking.

www.dexion.co.uk/References/Storing-of-Long-Goods/XL-Byg-Denmark

Benefits

- ✓ Maximum use of floor space
- ✓ Access to individual planks
- ✓ Offers greater flexibility
- ✓ High density storage
- ✓ Locking rollers for safety
- ✓ An additional storage area can be created above

Tailor made shelving solutions

Our HI280 shelving range has a number of possibilities which can be tailored to meet even the most unusual storage requirements. Equipped with our specially designed display accessories we are able to meet the daily challenges faced by Builders merchants and DIY retailers.

The option to combine shelving with a mezzanine floor or offer a multi-tier solution can maximise the height of your retail area. Storage of small parts or odd shaped and bulky items like plastic guttering and drainage pipe junctions are challenges we solve for the building trade on a regular basis.

YESSS an electrical wholesaler in the UK used HI280 for their back of counter storage area.

www.dexion.co.uk/References/Storage-of-Small-Parts/Hi280-Longspan/YESSS-Electrical-UK

Benefits

- ✓ Shelf widths of up to 2.5m
- ✓ Adjustable in 25mm steps
- ✓ Multi-tier solutions possible
- ✓ Wide range of display accessories
- ✓ Shelf loads of 75 - 400Kg per shelf

More information see:

Bulk horizontal storage for outside use

Cantilever racking is the obvious choice for sheet materials and awkward shaped goods.

Available in a galvanised or painted finish the cantilever racking can even be fitted with a roof. Galvanised is rust free finish and ideal for outdoor storage. Access from the front makes this system ideal for long or awkward items.

Daidsens Tommerhandel of Denmark used cantilever racking for the storage of large flat sheets of processed wood.

www.dexion.co.uk/References/Storing-of-Long-Goods/Daidsens-Tommerhandel-Denmark

Benefits

- ✓ Indoor or outdoor use
- ✓ Accommodates long lengths
- ✓ Easy access
- ✓ Adjustable system
- ✓ Arm lengths of up to 2m

Bulk storage of goods on pallets

Pallet racking makes the ideal storage system for the storage of bulk goods on pallets. The versatility of pallet racking means that it can be used with a variety of shelving and display options, such as vertical storage, to provide bulk storage either alongside or above the main retail display area.

Available in heights up to 30 metres and varying widths and depths, our P90 racking can perfectly occupy any space.

Benefits

- ✓ Adjustable system in various heights
- ✓ Choice of depth and width
- ✓ Range of accessories e.g. timber and mesh shelving panels
- ✓ Beams can be adjusted in 50mm increments
