"Our tyre storage solutions are all about storage efficiency, quality and ergonomics"

Optimal storage of tyres is about obtaining the maximum amount of tyre storage in the available space without affecting the quality of the tyre - while ensuring efficient and ergonomic handling, through all seasons.

Tailor-made solutions - from a small shelving system for the local used car dealer to an automated high-rise rack installation for the international tyre manufacturer. It needs to be flexible enough to precisely fit whatever height, depth and width available.

Quick Guide to our Tyre storage solutions:

	Vertical Tyre Storage	Horizontal Tyre Storage	Limited Storage space	Sufficient storage space	Manual Handling	Handling Equipment	Stillage Storage
HI280 Shelving	■		□	□	□		
HI280 Mobile	■		□		□	□	
P90 Pallet Racking		□		□		□	□
P90 Pallet Racking	■				■		
Mobile Pallet Racking	■	□	□	□		□	□
P90 Tyre Rack		□		□		□	
Tyre Tower Paternoster	■		□	□	□
