Quality and Safety on board - Shelving and Cabinets for marine use

HI280 Ship Shelving and Cabinets components are manufactured from high grade pre-galvanized steel.

The system is a heavy-duty, versatile product available in a wide choice of sizes to enable individual solutions to be tailored to client requirements. It is quick and easy to assemble with the main components simply hooking and locking together to provide a strong rigid structure. We can also provide a full range of accessories specifically designed for the safe storage of small cargo parts keeping them in place even in roughest sea conditions.

- **Pre-galvanized components**
- **Standard modules kit of Ship Cabinets**
- **High load capacities**
- **Fixed to the ship hull (no welding)**
- **Quick installation**
- **Safety and strength approved by NATO and Lloyd**

Standard cabinet modules - designed for fast and simple ordering

Standard cabinet dimensions are 2100 x 500 x 1050 mm (HxDxW). The heights 1000 and 1600 mm can also be supplied.

The cabinets are fully steel clad, doors and trays have a white painted surface. The doors are equipped with a lockable door set including a built-in handle to avoid injuries. All shelves come with a front bin to prevent small

items from falling out.

The cabinets vary in number of components, such as shelves, dividers and drawers. Our standard cabinet system can be customized to a great number of different requirements, e.g. we can supply a cabinet with a height of 1800 mm but with a 1600 mm door.

To place an order or for more information please contact us.

Wide range of accessories:

Furthermore, we can provide you with a wide range of bins and trays, from the very small parts bin all the way up to the large Euro Containers.

Accessories make it easy to adapt your storage solution to your requirements, to accommodate goods with different or unusual dimensions or simply to improve organisation in your warehouse.

You find more information about our accessories here.
