Even in a state-of-the-art warehousing operation the standard pallet racking system is still the most common form of pallet storage. In any number of industries logistic companies appreciate the versatility of our pallet racking, which can be assembled as single or double depth racks. Available in heights of up to 30 meters and varying depths and widths, the P90 will perfectly fit into the space available and is suitable for all kinds of storage media – Euro, disposable or captive pallets, mesh boxes or bins. Pallets stored in this way are not subject to any restrictive layout, but are freely accessible at any time.

Product Range

Optimum adaption

No matter whether you use Euro, disposable or captive pallets, mesh boxes or bins for storage – P90 pallet racking easily adapts to the formats you need in terms of width, depth and bay area...

High stability

Thanks to the especially stable method of construction and high-quality workmanship, rack heights of up to 30 metres and maximum bay loads of more than 30 tonnes present no problems for the P90. In addition to this, all P90 components are permanently protected against outside influences to guarantee the long service life of your system – from the frame, right down to the smallest individual part.

Comprehensive accessories

With the right accessories from our extensive catalogue, you can adapt every pallet racking system perfectly to your particular needs. As well as different beams, angle supports and shelf bases, a large number of safety elements are also available. In addition, you can also choose from numerous elements for marking and equipping special racking systems.

Absolutely future-proof

Should you need to store different goods in the future, that presents no problem at all. No matter how your requirements develop in the future – the P90 will adapt to meet them. With its modular construction method, bay sizes can be changed with ease. And the extensive range of accessories guarantees a perfectly equipped system even when needs change.

Benefits

- Perfectly adaptable
- Heights of up to 30 m
- Variable depths and widths
- Suitable for all kinds of storage media
- According FEM,SEMA,DIN,INSTA
- 50mm height adjustment
