

Reference: Storage Machines and WMS

Constructor Scandinavia provides storage, archiving and logistic solutions for use in factories, warehouses, distribution centres, archives, offices, museums, libraries, medical institutions, retail outlets and numerous other applications.

Storage Machines and WMS is a reference in the category

Our Solutions:

- Long Goods Handling
- Pallet Handling Solutions
- Retail Solutions
- Small Part Handling
- Special Product Solutions
- Storage and Work Areas
- Storage Machines and WMS
- Warehouse Intelligence System - C-WMS
- Warehouse Solutions

Please visit www.constructor-storage.com for more references.

Storage machines, automates, are computer-controlled storage and transfer systems that significantly improve the efficiency of product storage and picking.

They are easy to integrate with the company's WMS or can be used as standalone systems. The site and operating environment determine the system's size and composition.

An automatic storage system saves up to 70% on floor space, reduces picking errors by 70% and decreases picking time by more than 60%.

The most efficient way of using storage machine is to have article management included with the machine. TC2000 article management software is especially developed for Tornado, Paternoster and HOCA and it can be included as standard to all our machines.
