

Products & Systems

Constructor has a wide range of storage equipment available to meet your storage needs whatever you are storing.

From working with our customers and fully understanding their detailed requirements we are able to propose various solutions which can best utilize the space available whilst also considering the product selectivity, picking rates and investment required.

- Pallet Handling
- Small Part Handling
- Long Goods Handling
- Storage Machines & WMS
- Storage & Work Areas
- Special Products Solutions

Through evaluating these different options with our customers we are able to ensure the customer gets the best return on their investment in all respects.
