

Quotations

Constructor will always endeavor to fully understand our customers requirements and by working closely with them from initial concept through to defining a detailed specification we are able to provide clear and detailed proposals to our customers.

Depending on the requirement we can provide a full spectrum from an outline budget guide to help evaluate project feasibility or assess alternative storage options to a fully detailed quotation. This can include;

- Technical product specification
- Layout drawing of alternative options
- Fully costed and broken down into relevant areas
- Leadtimes and detailed project plan when required.

Whatever our customer requires we will always endeavor to tailor our solution to their requirements and make it a clear and simple choice to work with Constructor.
