

News:

Constructor Russia to showcase Pallet Shuttle at InnoSklad 2017.

If you're looking to save warehouse costs, increase capacity, boost productivity and have a successful day out, come along to our stand and to the Demo Warehouse at InnoSklad Expo Nov 2017.

For the duration of the show, which is being held at Expoforum Center in St Petersburg on November 28 to 30, the Constructor Russia team will be running demonstrations of their Pallet Shuttle system.

"Everyone who sees the Pallet Shuttle in action is impressed", said Alexey Borzenko, Managing Director. "It is a supreme example of semi-automation efficiency in action. The speed and accuracy achieved by using an electric shuttle to load and unload pallets has to be experienced, so being able to showcase it at the exhibition is ideal. Clients old and new will be warmly welcomed, so please drop by at any time."

Now in its 4th year, this exhibition has become a must-see event for many visitors. The Constructor team will be on hand to discuss the Pallet Shuttle as well as the rest of the Constructor range of storage solutions, products and services.
